SUMMARY

I am an ICT student at Mahidol University, passionate about software development and artificial intelligence, and thrive on tackling complex computational challenges through practical application and continuous learning to enhance my understanding and skills in emerging technologies.

EDUCATION

Mahidol University   **2024 - present**

Faculty of Information and Communication Technology

Thawaranukul School   **2018 - 2024**

Computer & English Program
- GPA : 3.95

ADDITIONAL INFORMATION

- **Programming Skills:** C, C#, Java, Python
- **Backend Development:** ASP.NET Core, RESTful API Development, MVC Architecture, Entity Framework, SQL Server
- **Cloud & DevOps:** Microsoft Azure, Docker, Git, Postman
- **Languages:** Thai, English

WORK EXPERIENCE

Software Development (Coursework)   **2024 - 2025**

- Wrote and debugged MIPS assembly programs to implement arithmetic, memory, and control operations using the MARS simulator.
- Developed Java applications demonstrating Object-Oriented Programming (OOP) concepts, including class design, encapsulation, and inheritance.
- Developed a Java-based simulation demonstrating data transfer and error control mechanisms at the data link layer.
- Used Python to solve mathematical problems, applying logical thinking and algorithmic techniques.

National Student Arts and Crafts Competition   **2023**

- The 70th National Student Art and Craft Competition for the academic year 2023. The competition featured Web Applications development for students in grades 10-12.
