NAWAPHON KITTISONGKHRAM

+66092-248-8821 - kaonawaphon@gmail.com - github.com/banameow

SUMMARY

Undergraduate student at Mahidol University's Faculty of Information and Communication Technology, pursuing a minor in Artificial Intelligence. Experienced in software development and programming, I am interested in Machine Learning, Computer Vision, and Knowledge Representation, particularly their potential applications in healthcare. Passionate about practical experimentation and developing computational solutions to real-world challenges.

EDUCATION

Mahidol University **2024 - present**
Faculty of Information and Communication Technology
Minor in Artificial Intelligence
- Cumulative GPA: 3.75

Thawaranukul School **2018 - 2024**
Mini English Program | Computer & English Program
- GPA: 3.95

RESEARCH INTERESTS

- **Knowledge Representation & Knowledge Graphs:** Exploring structured representations of knowledge and relationships between medical concepts.
- **Virtual Knowledge Graphs & Data Integration:** Interested in connecting diverse medical data sources through unified knowledge representations and semantic querying.
- **AI for Healthcare:** Exploring how artificial intelligence and structured knowledge can support reliable information discovery and practical healthcare applications.

TECHNICAL SKILLS

Programming Languages
Python · Java · C · C# · Dart

Machine Learning & Deep Learning
TensorFlow · Keras · NumPy · Pandas · PyTorch

Databases
SQL · SQL Server

Software Development
ASP.NET Core · RESTful APIs
Entity Framework Core · MVC Architecture

Tools & Platforms
Git · GitHub · Docker · Postman

Languages
Thai · English

PROJECTS

CNN-Based ECG Analysis for CAC Score Prediction
Python · TensorFlow · Keras
- Explored the use of deep learning for predicting Coronary Artery Calcium (CAC) scores from ECG signals.
- Developed and experimented with CNN-based architectures to learn relevant patterns from ECG data.
- Evaluated model performance using validation metrics and comparisons across different model configurations.

Cross-Platform Health Integration SDK
Flutter · Dart · Native Platform Integration · API Integration

- Developing a reusable Flutter SDK to integrate health-data functionality into native Android and iOS applications.
- Implementing health-data permission management and synchronization through platform-specific health services.
- Integrating backend API communication and WebView functionality to support application-level interactions.

Software Development & Programming Coursework
Java · C · Python · MIPS Assembly

- Developed Java applications applying Object-Oriented Programming principles, including encapsulation, inheritance, and class design.
- Implemented MIPS assembly programs involving arithmetic operations, memory management, and control flow.
- Applied Python programming to solve mathematical and algorithmic problems.

PROFESSIONAL DEVELOPMENT

AI Engineering from Scratch
Self-Directed Learning · In Progress
GitHub Repository Link

- Studying mathematical and computational foundations of artificial intelligence, including linear algebra and machine learning fundamentals.
- Implementing selected concepts through Python coding exercises to strengthen understanding of underlying algorithms.

SEMINARS & ACADEMIC ACTIVITIES

AI Healthcare & Well-Being Summit 2026: From Global Frontier Research to Real-World Impact |
June 2026
MHESI · Mahidol University · Digital Council of Thailand

Modern Systems & AI Integration with Rust: Building the Future on Solana |
January 2026
Mahidol University · Solana in Thailang

AI-Powered Banking: How Machine Learning is Revolutionizing Financial Services |
September 2025
ICT Mahidol · SCB TechX

COMPETITIONS

National Student Arts and Crafts Competition
The 70th National Student Art and Craft Competition for the academic year 2023. The competition featured Web Applications development for students in grades 10-12.

Student Arts and Crafts Competition
The 70th District-level Student Art and Craft Competition for the academic year 2022. The competition featured Web Applications creation activities for students from grades 10 to 12.
